DETAILED ACTION

Allowable Subject Matter

1. Claims 1-22 are allowed.
2. The following is an examiner's statement of reasons for allowance: independent claims 1, and 6 teach a network routing system with "a pair of separate paths" that simultaneously route data with an input router node and a terminal router node which are common to each path that routes data along both paths, preselecting a router on a path and while still routing data on a path, upgrading software by preparing new software from the original software in the preselected router by swapping the new software for the original software without interruption and imperceptibly to the other routers.
3. The closest prior art of record does not teach upgrading software in a router specifically while maintaining multiple paths and basing new software on original software. Therefore, independent claims 1, and 6 are allowable over the prior art.
4. Claims 2-5, and 7-22 are allowed by the same rational as well as the further limitations added by these dependent claims.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
